Become familiar with our COVID-19 health and safety protocols before visiting the museum

- Museum entry will be limited in capacity and time in order to allow for proper social distancing and to allow staff to clean and sanitize more effectively. Visit the website to follow reservation process for entry to the museum.
- We ask that you do not visit the museum if you have been traveling in highly affected areas, show any signs of the virus or any virus, and/or have been exposed to a positive case of COVID-19.
- All adult visitors and children over 10 years of age and older are required to wear a face mask at all times while in the museum. Any changes to this rule will be addressed as we receive health and safety mandates.
- We strongly encourage visitors to use the hand sanitizer before entering and leaving the museum, which is provided at the front entrance and the admissions desk.
- If you are not able to keep your scheduled time slot from your previously purchased tickets, please let us know. This allows space to open up for other visitors and we will be happy to reschedule your tickets or process a refund.
- Any guest who chooses not to follow these rules and guidelines will be asked to leave the museum, will not be allowed to return to the museum on that same day and no refund will be issued.
- Museum rules are subject to change at any time and are enforceable by all staff members. Please be kind.

COVID-19 health and safety protocols for staff

- All employees are screened daily for temperature and are required to follow the same protocol of all visitors. Any staff having a temperature of 100 degrees or higher will not be allowed to work until the criteria established by the Center for Disease Control has been met.
- All museum staff are required to wear a mask until further notice.
- Although, the museum has always established cleanliness as the priority for children and their families, all daily cleaning and disinfecting protocols have been increased, as well as scheduling the monthly application of a non-toxic antimicrobial disinfectant. This process is measured regularly for germ level. We have been pleased with the process and the success of keeping germ levels extraordinarily low.
- Any staff exposed or possibly exposed to the COVID-19 virus are asked to let the museum leadership know and will be allowed to return to the museum for work when cleared by a doctor or having met the criteria established by the Center for Disease Control.
